

USF's 38th Annual Engineering EXPO

Friday, February 19, 2010 and

Saturday, February 20, 2010

9:00 am - 4:00 pm

**Engineering Complex, University of South Florida
Tampa Campus**

Engineering EXPO is the USF College of Engineering's Celebration of National Engineering Week. Our main goal is to educate elementary, middle and high school age students on how math, science, engineering and technology affect our everyday lives. In addition, EXPO showcases exhibits from engineering student societies, organizations and local companies to illustrate the fun in engineering. We want to excite students to explore new pathways and careers!

All activities at EXPO are free! Food, drinks, souvenirs and candy can be purchased at the event. We recommend either packing a lunch or bringing money to purchase food.

Some of our traditional activities are:

- Physics: The Science of Everything Show
- Chemical Magic Show
- Laser Light Show
- Robot Demonstrations

**Please bring your class,
group or family for an excit-
ing day spent learning more
about engineering!**

Please register at: <http://expo.eng.usf.edu>
