

# Be all you want to be with a great career in manufacturing

## High-tech medical instruments, rocket engines, electronics

— everything we use has to be made. Designing new products, making prototypes, setting up, testing and running production, packaging, shipping and distribution requires creativity. Behind every product there is a high-wage, high-skill, high-energy job in manufacturing waiting for you!

## Manufacturing offers a world of possibilities.

No matter which area you choose, manufacturing offers a range of amazing job choices.
